Attention: [redacted]

SUBJECT : Release of [redacted]

25X1
1. [redacted] has been serving in the capacity of Personnel Technician with Base A since 26 March 1956. Due to his lack of flexibility and psychological unsuitability, he proved himself unable to adapt to the composite type of operation involved; and his recall was requested by his Commanding Officer, [redacted]

25X1
2. [redacted] reported that [redacted] unhappy faculty for concentrating on the minute points of a job to the exclusion of the major is unequalled. In addition, his chronic dissatisfaction with physical surroundings, mild apparent hypochondria, and unhappiness with personal progress were factors which contributed to his unsatisfactory performance." He suggested that [redacted] should probably be assigned to a position requiring a knowledge of set procedures and having a set production rate; that if [redacted] were faced with a specific job with specific requirements, he could probably perform acceptably.

25X1
3. In view of the fact that we do not have a position within the Project for which [redacted] can be considered, we are requesting his reassignment by the Air Force.
